

What? So What? Now What? - Reflection

	What?	So What?	Now What?
1	We had a few group meetings, created a project summary and started planning out our project on Trello.	So now we all understand what the project is about and what needs to happen.	We now need to continue our regular group meetings and follow the plans that we have made on Trello.
2	We attended the weekly Lectures and Seminars to gain knowledge on how to proceed with the project.	We were able to discuss with our tutor the different possible paths and options to take.	Now we can begin working on the sprints and make progress with the project.
3	We successfully completed the first Sprint after a series of weekly meetings.	The video of the Sprint Retrospective was finalized and presented to the class for feedback.	Now we are ready to attend the next seminars to comprehend what is required for the next Sprint.
4	We reflected on the first Sprint, what worked and what did not to effectively handle future Sprints.	We understand the process of sequentially completing Sprints as well as efficient planning in Trello.	Now we are better equipped with the knowledge to plan and complete upcoming Sprints.
